

Good things

- Lectures easy to understand/interesting x 5
- Course content is interesting x 5
- Labs interesting/fun x 4
- Interesting technology and applications x 3

Things to improve on

- Too much homework, or make homework a higher percentage of the grade x 7
- Course moves too fast x 7
- Homework is tedious x 2
- Lab exams too hard or stressful x 2
- Don't like working in pairs x 2

Plan of action

- Can't change percentage of homework grade now, but will seriously consider this for future semesters
 - On the other hand, a small home work percentage means you can afford to mess up on one or two homework assignments without destroying your grade
- I will increase efforts to revise previous concepts at the start of each lecture
 - But, if the course seems too fast, you probably need to be doing homework exercises **before the next class**
 - Do your homework in the TA room, 7-11pm Sun-Thu and 3-5pm Sunday
